SIGNATURE

CENTURY[®]

For three generations the Century family has crafted furniture here in North Carolina at the foot of the Appalachian Mountains. We have always taken care to build pieces that deliver on the promise our founder made at the start of the business: to create furniture of such impeccable quality that it brings pride to both the customer who purchases it as well as the craftspeople who make it.

Within the catalog you are currently holding, we have a selection of our finest upholstery designs, refined over our many years of creating custom products. Each item is handcrafted in the classic "bench made" method and tailored to your unique style. We encourage you to personalize these beautiful pieces by choosing from our curated assortment of the world's finest fabrics and trims. Add fun and unique elements that speak to you such as nailheads and tapes. If you find a style you love but the standard size does not work for your room, contact us and allow us to make it to your exact specifications.

There is nothing more personal than the spaces we share with our family and friends. That is why here at Century we take furniture personally. From our family to yours, it is an honor to be considered a resource for your home.

How we make your upholstered furniture.

Beauty from the inside out.

Deep within each piece of Century upholstered furniture, hidden from view, are a number of important features that contribute directly to the comfort, durability and quality of your furniture. Look carefully at each step below to understand the time and care that goes into crafting each piece of Signature upholstery from frame to padding to fabric.

* On most styles

Adjustable guides are provided on all skirted styles for easy adjustments on carpeting

Curves and shaped arms and backs are trademarks of craftsmanship

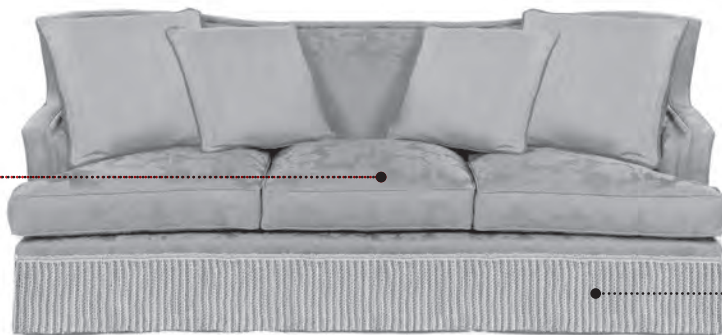

Choose your back and seat cushion configurations to suit your style preference. One over one, two over two, three over three or anywhere in between.

Fabrics are flow matched on all sides so patterns appear uninterrupted

Throw pillows are individually encased in down proof ticking and come in a variety of standard styles and "Signature" throw pillow sewing options.

Multiple cushion options are available and all are wrapped in virgin polyester fiber then sewn and encased in down proof ticking.

Century offers up to six skirt options plus the option to not use a skirt at all. You can change a standard kick pleat skirt to any style we offer.

Making fine upholstery is an art that combines skill, talent and hard work.

It requires the ability to visualize how a piece of upholstery will look perfectly flow-matched, and then having the skills to cut and sew the fabric, build and spring up the frame, and ultimately apply the fabric to this so that the pattern will achieve your vision. Considering the extraordinary sculptural shapes of most Signature upholstery this is truly remarkable.

It is the difference between an ordinary sofa, and a work of art, a chair and a sculpture.

OPTIONS | DRY BRUSHING AND LEAFING

Gold Dry Brushing

Silver Dry Brushing

Gold Leaf

Silver Leaf

Dry Brushing - A gold or silver paint is made by combining a mixture of gold or silver powder to a clear glaze or gloss lacquer. It is applied by a skilled artisan to recessed areas to accentuate carved detail and mouldings. The brush is dipped in the mixture, then is brushed on an absorbent surface until it is nearly dry. Only then is it applied to furniture. As a result, it is more subtle than leafing.

Leafing - Thin foil sheets of faux silver or gold leaf are applied by hand to accent design details such as carving and mouldings. They are then worn through and burnished to a fine patina to simulate aging.

OUR ENVIRONMENTAL STEWARDSHIP

At Century our environmental policy is a key element of our corporate philosophy. Since our beginnings in 1947, it has been our culture to be socially responsible with the safety and health of our associates, our business partners, our customers and our natural environment. We are committed to reducing our environmental impact through intelligent design, conservation, and recycling.

We believe the best way to conserve environmental resources is to design and manufacture furniture of such impeccable quality that it will last for generations. Nothing is more wasteful than disposable furniture.

The vast majority of our furniture is manufactured in Hickory, NC from predominantly domestic materials. Very high energy costs are involved in the transportation of furniture and raw materials. When items are produced locally, the environmental footprint is much smaller.

We strive to meet or exceed all regulatory or industry standards in terms of safety and potential emissions to the environment. No resource is more important than the health of our associates. We set and continually review objectives and targets to protect our global environment. We seek not only to comply with safety and environmental regulations, but also to implement in-house standards to continuously improve our environmental performance and reduce our environmental footprint.

We believe in renewable energy. We will continue our efforts to reduce energy use by combusting scrap wood and sawdust to generate power for our manufacturing facilities.

We believe that recycling is critical to pollution prevention: Computers, ink cartridges, batteries, paper, cotton, fabric and leather scraps, cardboard, pallets, fluorescent bulbs, cans, glass and bottles, etc. Every employee is empowered and motivated to recycle whenever possible and systems are in place to maximize our recycling efforts.

Century has been recognized with the coveted Sustainable by Design registration, awarded by the American Home Furnishings Alliance (AHFA) for the company's achievements on a path of environmental stewardship. To enter AHFA's Sustainable by Design program Century first had to implement an environmental management program known as EFEC, which required all facilities to analyze the environmental impact of their operations. This resulted in improved management of resources and raw materials, reduced energy and water consumption, reduced waste and improved recycling efforts.

Sustainable by Design required the company to extend its culture of environmental stewardship throughout its global supply chain. For each key area on a checklist, Century established goals and a system for evaluating annual achievement. These key areas included:

- Supply chain management, including assisting suppliers worldwide in the development and implementation of sustainability programs.
- Using eco-friendly materials, including low VOC/low HAP coatings, certified lumber and low-emitting UF resins.
- Global climate impact, including calculating a baseline carbon footprint.
- Social responsibility, including policies defining the company's commitment to workers' rights and community relations in all areas of the world where Century does business.
